

Grid Connections Manager

We are seeking to appoint a Grid Manager to play a lead role in the management of grid connections for our renewable energy and hydrogen projects in the UK.

We are seeking an experienced professional who should be able to demonstrate a track record of management of grid connections at both distribution and transmission level along with knowledge of the corresponding development and planning processes. The ideal candidate is degree or higher educated, has direct UK project experience and professional qualifications. The role includes:

- Submitting grid connection applications (inc BELLA/BEGA applications where appropriate) for:
 - generation sites (wind & solar);
 - hydrogen sites; and
 - seeking amendments to existing applications for co-location of hydrogen, batteries and generating technologies (e.g. solar on a wind site).
- Managing the relationships with DNOs and NGET;
- Managing grid connection obligations and compliance for all connections;
- Input into strategy for identifying and securing new sites based on grid capacity (both generation and demand);
- Undertaking preliminary assessments and managing feasibility studies;
- Participating in project design and development;
- Managing grid connection budgets; and
- Reporting on budget status, milestones, liabilities etc to project teams and to the board.
